GENERAL REQUIREMENTS

LIFE CYCLE COST ANALYSIS – ENERGY & WATER

6C.3.1 - 11

May 12, 2023

Northeast Metropolitan Regional Vocational High School
Life-Cycle Cost Estimate
Executive Summary

Included herein is a life cycle cost estimate for the proposed new Northeast Metropolitan Regional Vocational High School in accordance with the requirements of MGL Chapter 149 Section 44M and per MSBA design development guidelines. This estimate is provided for the HVAC and Plumbing systems.

STUDY INPUTS

- It is assumed that the District's initial cost will be paid in the form of a municipal bond over a period of 30 years. The interest rate used to determine annual payments is based on 3.5% for the initial municipal bond and 3.5% for the future partial system replacement. The actual rates may differ.
- The study length is based on 30 years, which is consistent with the finance period.
- The discount rate for the cost of money is set at 3.5%.
- The cost for a partial system replacement in year 20 is based on 20% of the initial system cost.
- The initial cost to the district for the HVAC and Plumbing systems is $17,488,178 after 50% MSBA reimbursement based on cost estimates. This cost is included in the overall bond financing for the project. This study does not include the total finance costs for the overall construction, only the HVAC and Plumbing portion.
- The estimated annual energy cost is $579,000 ($1.50 per SF) for the total electric utility cost including energy offsets from the projected electricity production from the utility company provide photovoltaic array. Actual costs may vary based on actual utility rates, building use, operation and climatic factors. An escalation rate of 3.5% is applied annually.
- Estimated annual maintenance costs are based on an estimated cost for an annual service contract by a local maintenance and service provider. Costs are based on $118,087 ($0.30 per SF) with a 3.25% annual escalation rate. Actual cost will depend on a final negotiated annual maintenance and service contract with a third party following the completion of construction.
- Salaries for maintenance and operations, supplies, or residual values have not been included.

STUDY RESULTS

- Cash flow details for principal and interest are provided based on equal payments. These payments are included in the general construction loan.
- The actual total life-cycle cash flow value for the 30-year period is $73,913,889 with a total present worth life cycle cost of $41,786,784.
- The portion of the life cycle cost related only to operating cost is $36,977,015 with a present worth value of $20,783,021 over the 30-year period.

General Information :

Design Case Name ..... Life Cycle Cost Estimate for HVAC and Plumbing
Design Case Short Name ...
Description:
30 year life-cycle cost estimate for HVAC system finance and operating costs.

Investment Costs :

Cost Item	Cost ($)	Year Incurred	Esc Rate (%/yr)	Salvage Value ($)	Useful Life (yrs)
Proposed Mech System Initial Cost	$ 9,000,000	0	0.00	$ 0	30
Proposed Mech System Initial Cost	$ 8,488,178	0	0.00	$ 0	30
Mech System Replacement Cost	$ 6,995,271	20	0.00	$ 0	10

Loans :

Loan Item	Start Year	Investment In Start Year ($)	Percent Financed	Term Of Loan (Years)	Interest Rate (%/yr)	Payment Method
Municipal Bond Financing for HVAC	0	$ 24,483,449	100	30	3.50	Equal Payments
Replacement Cost Financing	20	$ 24,483,449	100	10	3.50	Equal Payments

Annual Operating Costs :

Cost Item	Cost ($)	Start Year	Number Of Years	Esc Rate (%/yr)
Annual Energy Costs	$ 579,000	1	30	3.50
Annual Maintenance Costs	$ 118,087	1	30	3.25

There are no non-annual operating cost inputs
